

# GRAND SPORT COLLECTION 2019

## BE GRAND IN SPORT!

# ABOUT GRAND

GRAND Hosiery Factory is a Russian leading manufacturer of premium and middle-priced hosiery knitted products. Nowadays GRAND product range exceeds 300 socks and panty hose models, which constitute Men, Women, Kids and Sport collections.

Based on extensive experience and deep expertise in the field of hosiery manufacturing, GRAND specialists in cooperation with sport professionals have developed the special series of functional socks for sports and outdoor activities – GRAND Sport Collection.

**OUR MISSION** – to develop and manufacture first-class high-tech hosiery products, which perform as reliable, comfort and positive companion throughout versatile life of modern people. **MOVE THROUGH LIFE WITH GRAND!**

All products of different types, styles and functions are characterized by high European quality due to manufactory facilities with the latest technology and use of the best raw materials from world-class suppliers.

# FEEL GRAND ADVANTAGES

The distinctive feature of GRAND Sport Collection is in the presence of specific effects and functional properties, which help to engage in sports and outdoor activities with maximum involvement and comfort.

## Compression support for muscles

Special knitting technology, characterized by intelligent tension distribution throughout entire garment or separate part of it, promotes improved circulation and thereby supports muscles in tone, consequently reducing the risk of pain, feeling of heaviness and fatigue in the legs.

## Stabilization and injury prevention

Thanks to the knitting with elastic materials, optimum dynamic muscles and joints stabilization is achieved, which, on the one hand, absorbs excessive and energy-consuming micro-vibrations, and on the other hand serves as a protective shell, reducing the occurrence of tears, sprains, twists and other types of injuries.

## Pressure and shock absorption

Padded, reinforced areas of the sock (protectors) relieve the pressure of the shoes during active motion. A reinforced knitted layer in the sole works as shock absorber, making riding, walking or running more comfortable. In addition, these pads protect the socks from abrasion and increase its lifetime.

## Comfort fit

Perfect close fitting without folds and slipping down provides absence of pressure points and frictions during motion, therefore decreases risk of blisters and corns, especially in hard boots.

## Heat management

The use of materials with good thermal insulation properties (wool, acrylic) and the special fabric construction allow to create the sufficient protective layer on the principle of «one-way street», which prevents the enter of cold air from the outside and at the same time maintains the optimal body temperature without overheating.

## Moisture management

Timely moisture removal from the skin surface is processed by special fabric structure of synthetic fibers, using a system of internal and external channels. As a result, the causes of unpleasant feelings of dampness, wet sliding and «steam bath» are excluded.

## Antibacterial and odor-reducing properties

The natural properties of materials such as wool prevent the spread of bacteria and, consequently, the occurrence of an unpleasant odor, even during long hikes or multi-day races.

# ALPINE SKIING

Four specialized versions of GRAND ski alpine socks differ by materials and knitting technology as well as by visual appearance, thus corresponding different rider levels and taste preferences.

## KNEE-HIGH SOCKS FOR ALPINE SKIING BASE

Article number XWL29

BASE VERSION

A great solution for those who like to spend all the day long on the fresh air among the slopes. Compression support allows you to keep energy and feel fresh not only during riding session, but also for the rest of vacation.

### MATERIAL:

35% acryl  
15% wool  
41% polyamide  
9% elastane

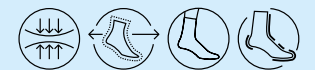

- Soft and comfortable top band for a stay-put fit without overpressure and slipping down.
- Thoughtful blend of wool and acrylic fibers provides optimum thermal balance and unmatched wearing comfort in cold weather.
- Targeted padding on shin adds extra cushion and protection from external pressure.
- The elastic knitting ensures anatomical fitting on the leg without friction and folds as well as provides light compression support in the ankle and calf muscles.
- Compression zone in middle of foot part for additional arch stabilization.
- Reinforced heel and toe zones provide extreme durability.
- Flat toe seam prevents pressure points and rubbing the fingers.

### COLORS:

# KNEE-HIGH SOCKS FOR ALPINE SKIING RACE

Article number **XWL19**

**RACE VERSION**

For advanced downhill riders, when ultimate movement and consequently perfect contact with boots are appearing at the forefront. Therefore, the focus is on thin fabric and supportive compression as a source of extra energy.

### MATERIAL:

97% polyamide  
3% elastane

- Soft and comfortable top band for a stay-put fit without overpressure and slipping down.
- Functional knitting of thin and light materials for perfect contact with tight footwear and better motion control at high speeds.
- Anatomical elastic knitting provides perfect wrinkle-free fit, stabilizes and support muscles for all day activities.
- Targeted padding on shin adds extra cushion and protection from external pressure.
- Compression zone in middle of foot part for additional arch stabilization.
- Padded heel and toe zones provide additional amortization and extreme durability.
- Flat toe seam prevents pressure points and rubbing the fingers.

# KNEE-HIGH SOCKS FOR ALPINE SKIING THERMO

Article number **XWL18**

**THERMO VERSION**

The balanced combination of thermal insulation properties of acrylic and wool fibers with functional advantages of synthetic yarns (elasticity, moisture management) provides unmatched comfort to rider's feet.

### MATERIAL:

53% acryl  
13% wool  
24% polyamide  
5% polypropylene  
5% elastane

- Soft and comfortable top band for a stay-put fit without overpressure and slipping down.
- Thoughtful blend of wool and acrylic fibers provides optimum thermal balance and unmatched wearing comfort in cold weather.
- Targeted padding on shin adds extra cushion and protection from external pressure.
- Anatomical elastic knitting provides perfect wrinkle-free fit without friction as well as moderate compression support for ankle and calf muscles.
- Compression zone in middle of foot section for additional arch stabilization.
- Reinforced heel and toe zones provide extreme durability.
- Flat toe seam prevents pressure points and rubbing the fingers.

# TRAIL-RUNNING

Trail-running is a separate running direction and therefore worthy of special attention. Close interaction with nature determines additional requirements for standard models of running socks, namely: strengthening of the plantar area for additional cushioning when running on rough and rigid surfaces, compression support of the ankle joint and calf muscles, improved moisture and heat management. GRAND has taken into account all the requirements and developed specialized models for trail-running.

## LOW-CUT SOCKS FOR TRAIL-RUNNING AMORTIZATION

Article number XWL23

**CUSHION VERSION**

Padding in the soles acts as a cushioning, which is especially important while running and jumping on rigid and rough surfaces. Due to the length this model is most suitable for running in hot weather on the terrain with low flora.

### MATERIAL:

- 44% cotton
- 54% polyamide
- 2% elastane

- Soft and comfortable top band for a stay-put fit without overpressure and slipping down is added by special cushion cap for shock absorption and protection from injuries.
- Anatomical elastic knitting provides perfect wrinkle-free fit without friction as well as stabilizing compression support for ankle.
- Padding in heel, toe and sole zones provides extreme durability and shock absorption.
- Flat toe seam prevents pressure points and rubbing the fingers.

# HIGH-CUT SOCKS FOR TRAIL-RUNNING BASE

Article number XWL24

BASE VERSION

High-cut socks with reinforced knitting in the ankle area reduce shock and fatigue impacts during running over rough terrain, especially over long distances.

**MATERIAL:**  
97% polyamide  
3% elastane

- Soft and comfortable top band for a stay-put fit without overpressure and slipping down.
- Anatomical elastic knitting provides perfect wrinkle-free fit without friction as well as stabilizing compression support for ankle.
- Compression zone in middle of foot part for additional arch stabilization.
- Padding in heel, toe and sole zones provides extreme durability and shock absorption.
- Achilles tendon protector lowers the risk of injury during cross-country running and jumping activities.
- Flat toe seam prevents pressure points and rubbing the fingers.

# TEAMSPO RTS

Maximum coordination and motion control – whether it is multidirectional movement on the court or hit the ball – require an accurate and close fit of the foot in sports footwear. The elastic knitting of GRAND teamsports socks guarantees the ultimate contact of the foot and shoes without wrinkles and slipping down, and special pads and compression zones provide additional protection in the most risky areas.

## MID-CUT SOCKS FOR TEAMSPO RTS SUPPORT

Article number XWL27

→ SUPPORT VERSION

Mid-cut socks provide ankle support and additional Achilles tendon protection, so that makes them right solution for team and running sports, especially when prevention of injuries or their recurrence is crucial.

**MATERIAL:**  
97% polyamide  
3% elastane

- Soft and comfortable top band for a stay-put fit without overpressure and slipping down.
- Anatomical elastic knitting provides perfect wrinkle-free fit without friction as well as moderate compression support for ankle.
- Padding in heel, toe and sole zones provides extreme durability and shock absorption.

- Special padding for Achilles tendon protection
- Flat toe seam prevents pressure points and rubbing the fingers.

# USEFUL INFORMATION

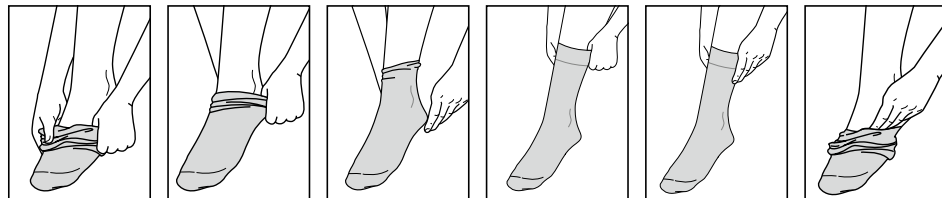

## SIZE CHART

For maximum wearing comfort, we recommend you to choose the socks size according to the charts below. The size of the socks is determined by the length of the foot: measure the distance from the tip of the thumb to the heel. If it is not possible to make measurements you can use shoe size as a guide, but this method may have some degree of error.

GRAND size	19 / 19-21	21 / 21-23	23 / 23-25	25 / 25-27	27 / 27-29	29 / 29-31
Shoe size	27-30	31-34	35-38	39-42	42-44	45-47
Foot length (cm)	16,2-16,9 – 18,3-19	19-19,7 – 21-22	22-22,6 – 23,3-23,9	23,9-24,6 – 26-26,7	26,7 – 27,3-28	28 – 29,7-30,6
Men socks						
Women socks						
Junior socks						

## WEARING INSTRUCTIONS

**1** Fold the top part over and down to foot section. Place your thumbs inside the sock. Use the toe line for right positioning.

**2** Smoothly pull the sock upper as far as the heel starts, keeping the straightness of the loop rows.

**3** Pull the sock over your ankle, making sure there are no wrinkles in the fabric. Check for correct fit at the heel.

**4** Fold the top part back up and pull up to the calf or knee (for knee-high socks) in stages. Make sure that there is no overstretching.

**5** Please note that the top must not be folded down when wearing the socks. If so, pull the sock down and try again, adjusting the length.

**6** To remove the sock use the reverse order.

**PRECAUTIONS:** In order to prevent damage of the knit – be careful with long fingernails and jewelry. Rough and calloused heels can damage the knit. Please ensure that the inners of shoes are in good condition: worn shoe linings could cause damage.

## CARE INSTRUCTIONS

All GRAND products must be washed carefully to protect the fibers and ensure that they retain their quality characteristics and functions. Please follow the recommendations below.

	BASE PRODUCTS (only synthetic yarns)		PRODUCTS WITH WOOL	
	40°	30°	30°	30°
	WASHING	DRYING	IRONING	CAUTION
<b>COTTON</b>	All water temperatures. Separate colors.	Dryer on high or hang dry.	Iron on hot or steam.	Don't use bleach unless garment is white. Overbleaching can cause yellowing or damage.
<b>WOOL</b>	Cold water. Separate colors. Use mesh bag. Wash inside-out. Machine wash on delicate cycle or hand wash.	Don't use dryer. Press out water with a towel. Reshape and lay flat to dry.	Steam only.	Don't use bleach. Check care tag to see if dry cleaning is recommended. Don't use hot water. Don't store in plastic. Keep out of sun. Don't use fabric conditioner.
<b>POLYAMIDE POLYESTER ELASTANE</b>	Warm water. Separate colors. Machine wash on normal cycle.	Tumble dry on low or line dry or hang dry.	Steam or press on low to medium heat	Don't use bleach.

**STORAGE:** Store at room temperature in a dry place. Protect from direct sunlight and moisture.  
**DISPOSAL:** You can dispose of this product with your household waste.

# TAKE ALL THE ADVANTAGES OF COLLABORATION WITH GRAND

## SUFFICIENT AND EFFICIENT PRODUCTION CAPACITY

Attractive wholesale and retail prices due to efficient scale and cost management
